

BEST PROTECTION MONEY CAN BUY

GMaxDrain is a pre-fabricated pad specially designed to flex upon impact, providing superior player protection over a 40-year lifespan. This pad offers great planarity and horizontal drainage capabilities optimal for a synthetic turf system. The Gmax Drain is a high density injection molded polypropylene pad made from recycled material and is fully recyclable after use.

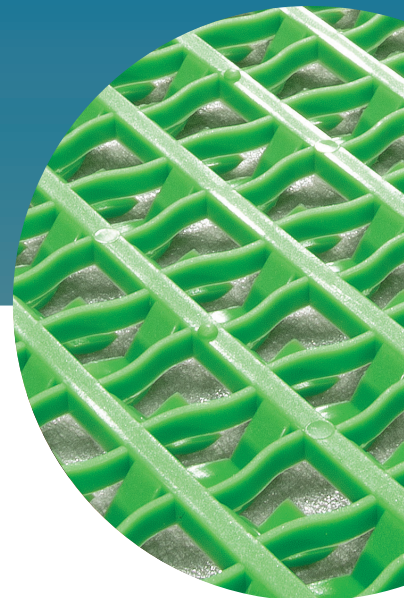

MAIN ADVANTAGES

- Environmentally friendly
- High-density prefabricated pad
- Easy interlocking installation - No adhesive needed
- 44% shock absorbency
- Superior foot stability
- Horizontal drainage; cost efficient and faster subbase construction
- Guarantees top performance level with 1.75"-2" turf pile height

BEST PROTECTION MONEY CAN BUY

GMAX DRAIN IS AVAILABLE IN GREEN AND BLACK

The 10mm GMax Drain[®] pad offers higher performance and protection for the athletes. The structure of the pad is focused to maintain the FIFA[®] Quality Pro shock absorption level over time, keeping vertical deformation values under control.

It works like a normal drain pad with the added value of enhanced shock absorption providing professional performance with a lower pile height turf.

THICKNESS	TILE SIZE	WEIGHT	SHOCK ABSORBENCY	VERTICAL DEFORMATION	WATER DRAINAGE
10 mm (+/- 1mm)	47.24" x 31.5"	48.66 oz./sq. yd.	44% (+/- 2%)	2 mm (+/- 1mm)	17 oz. per minute
